

EDUCATION

Bachelor of Science in Computer Science and Data Science, Rutgers University, New Brunswick 3.95/4.00 Sept 2024— Dec 2027
Accelerated Graduation Track
Honors: Data 101 Hall of Fame — 1st, Vapnik Challenge; 4th, Quinlan Cup (240 students), predictive modeling and pattern discovery (R)
Courses: Data Structures, Computer Algorithms, Introduction to AI, Computer Architecture, Statistical Inference, Data Management for Data Science (Databases)

SKILLS

Languages: Python, Java, JavaScript, C, R, SQL, HTML/CSS
Frameworks & Libraries: Django REST Framework, FastAPI, React, PyTorch, scikit-learn, Hugging Face, pandas, NumPy
Databases & Data: PostgreSQL, SQLite
Cloud & DevOps: AWS (EC2, IAM, SSM), Docker, Git/GitHub
AI/ML & Tools: RAG, NLP, Semantic Search, REST APIs, ETL, ServiceNow
Currently Pursuing: AWS Certified Developer – Associate (Expected Nov 2026)

WORK EXPERIENCE

Part-Time Lecturer — Data Science Sept 2025 — May 2026
Department of Computer Science Rutgers University, New Brunswick, New Jersey, USA
• Selected as an **undergraduate Part-Time Lecturer**, leading weekly recitations for a **250+ student course** and delivering a full-class interactive lecture while collaborating with faculty and graduate TAs.
• Pioneered **CodeBench integration** as the **first PTL** to implement it for **instruction and grading workflows**; developed course materials, coding exercises, and data projects.
• Mentored students through **office hours and exam preparation**, supported grading, and helped refine **curriculum and assessments** with the teaching team.

Lab Supervisor Sept 2024 — Present
Office of Information Technology (OIT) Rutgers University, New Brunswick, New Jersey, USA
• Supervise daily operations for a **200+ consultant program across four campuses**, handling technical escalations and service delivery; reviewed **500+ applications** and onboarded **50+ consultants**.
• Resolve **50+ technical requests daily** with a **95% first-contact success rate**, supporting enterprise systems, networking, account access, MFA, and endpoint issues through **ServiceNow, Icinga, Bomgar, and PaperCut**.
• Oversee **IT inventory and device deployment** and onboard **100+ students per semester**, minimizing downtime and ensuring system readiness.

Student Community Manager June 2026 — Present
Coding and Social Lounge (CSL) Rutgers University, New Brunswick, New Jersey, USA
• Created **CS111 study guides** to be used by **400+ students per semester**, simplifying core programming concepts into concise resources.
• Organized and hosted **alumni career panels**, connecting students with tech professionals to provide guidance on **internships, career paths, and breaking into the industry**.
• Provide **peer tutoring, academic advising, and project support** for CS students, helping with coursework and personal projects.

RELEVANT PROJECTS

ServiceNow AI Ticket Resolution Assistant github.com/Afn377/ServiceNow-Ticket-RAG
Technologies: Python, FastAPI, RAG, Sentence Transformers, BGE, DeepSeek API, JavaScript, Docker, AWS
• Built and deployed an **AI-powered RAG assistant for Rutgers OIT** that surfaces **cited, knowledge-base-backed resolution steps** directly inside ServiceNow through a Chrome extension.
• Engineered a **BGE embedding + semantic retrieval pipeline** with Sentence Transformers and DeepSeek, achieving a **94.5% retrieval hit rate** for relevant support knowledge across 200 test tickets.
• Beta-tested with **10 consultants across 50 tickets**, reducing average **ticket-response time from 17 to 10 minutes (41%)**; secured with **client-side PII redaction** and a Dockerized AWS backend.

ProfilQ - AI-Powered Professor Analytics Platform
Technologies: Python, Django, React, PostgreSQL, PyTorch, scikit-learn, Hugging Face, MiniLM
• Developed a **Django REST + React** system supporting professor search, filtering, comparison, review analytics, and recommendations; validated backend and ML workflows with **87 automated tests**.
• Engineered a **resumable ETL pipeline** using **RateMyProfessors GraphQL and Reddit JSON APIs**, with pagination, deduplication, checkpointing, and validation across **1.7M+ professor records**.
• Analyzed **350K+ student reviews** with VADER, Logistic Regression, and DistilBERT, achieving **85.7% sentiment-classification accuracy**; developed **MiniLM embedding-based recommendations** from review language.
